The readout

The launch moved from a broad release to a 12-customer pilot. That makes onboarding quality, not signup volume, the first proof point; legal approval remains the gating dependency.

2 decisions / 2 next moves / 1 open thread

01

Decisions

- **Narrow the launch: Start with 12 design partners before opening self-serve access.**
- Measure activation after the first completed workflow, not account creation.

02

Action Items

- ☐ Jordan - confirm the design-partner list by Friday.
- ☐ Unassigned - resolve the data-retention language before invitations go out.

03

Open Questions & Risks

- Legal review can still move the pilot date, and no fallback date was chosen.

04

Your notes

Written by you

- Keep the launch narrow.
- Confirm the pilot cohort
